Arcade with offset sash

Arcade with offset sash
Fig.: 1:1

Barrier-free balcony door threshold
Height: 20 mm / Fig.: 1:2

- 01 8 to 47mm thick glazing: possibility to use glazing with high thermal insulation and acoustic parameters
- 02 Two-foot glazing bead: additional anti-burglar protection
- 03 Rigid, fitted reinforcement: stable window construction
- 04 13 mm fittings groove: possible mounting of anti-burglar fittings
- 05 Two rebate seals: perfect thermal insulation, tightness under extreme weather conditions
- 06 5-chamber technology: optimum thermal insulation / U_i value=1.2 W/m²K
- 07 Draining holes and venting chambers
- 08 Mounting depth of 71mm: very good thermal insulation parameters help reduce the cost of heating
- 09 20-degree bevel: timeless design and functionality
- + Wide range: wide range of arcade system profile geometry options/ wide range of laminated foils Integrated solutions: arcade system is compatible with other Deceuninck systems, e.g. HST lift and sliding systems and PROtex roller shutters system.

Recycling Idea - Inoutic / Deceuninck is the initiator of the Rewindo GmbH association, which promotes the idea of recycling plastic windows subject to utilisation.
